## PERSONAL PROJECTS

- Spotify Clone
- Github Link-<https://github.com/shashankchauhan9528/SPOTIFY-Clone>
- I independently developed a Spotify clone using React, showcasing my proficiency in front-end development. This project involved implementing user interfaces, integrating APIs, and managing state efficiently.
- Food app
- Github Link-<https://github.com/shashankchauhan9528/Food-App>
- I spearheaded the development of a dynamic Food App using React for the front end and Node.js/Express.js for the back end. This project showcased my proficiency in full-stack development.
- Go Food
- Github Link-<https://github.com/shashankchauhan9528/MERN-project>
- As the primary developer, I conceptualized and executed Food Go, a major project demonstrating my prowess in full-stack development with the MERN (MongoDB, Express.js, React, Node.js) stack.. This comprehensive web application seamlessly integrates a user-friendly front end using React with a robust back end powered by Node.js an Express.js, while MongoDB ensures efficient data management.

## EDUCATION

### Diploma in computer science & Engineering

- Board of technical education Uttar Pradesh

10/2020 - 07/2023

Rampur, Uttar Pradesh

- College-Project

World wild Conservation

### Matrics

- Board of High school and Intermediate education UP

04/2019 - 03/2020

Budaun, UP

## SKILLS

HTML

CSS

JavaScript

React Js

Node Js

Express Js

MongoDB

Git

GitHub

Bootstrap

Redux

## ORGANIZATIONS

GeeksforGeeks (09/2023 - Present)

Student

## CERTIFICATES

MERN Full Stack Web Development (09/2023 - 11/2023)

I have successfully Completed the Course on MERN Full Stack Web Development of duration 8 weeks.

## LANGUAGES

English

Full Professional Proficiency

Hindi

Full Professional Proficiency

## INTERESTS

Programming

Online gaming

Travel

Cricket

## WORK EXPERIENCE

### MERN Full Stack Web Development Intern GeeksforGeeks

09/2023 – Present,

The main purpose of using MERN stack is to develop apps using JavaScript only. This is because the four technologies that make up the technology stack are all JS-based. Thus, if one knows JavaScript (and JSON), the backend, frontend, and database can be operated easily.
